

Press Release

We make room for more training.

HEREFORD, 2014-01-29.

Already offering one of the most respected programmes of industry recognised product and fitment training in the UK, Schaeffler is now gearing up to expand the training opportunities available to the independent aftermarket.

As well as designing, building and equipping a state-of-the-art training centre located at the Hereford headquarters (due to be officially opened early in 2014), Schaeffler has also added an experienced Technical Trainer to keep up with the demand for its accredited training packages.

Andy Walters will help deliver training on the company's three industry leading brands – LuK clutches, INA tensioners and FAG wheel bearings – to customers throughout the UK and Ireland. Andy, 32, joins the company from DAYCO where he was responsible for helping set up and manage the technical department.

He said: "I see my role as supporting our sales team and product managers by supplying professional training to our independent garage and motor factor customers across three brands world class brands.

"Schaeffler is well known and respected in the market-place and I am sure my background will help me provide the technical training our customers require over the coming months.

"I have only been at the company for a short time, but it has been a breath of fresh air. I have really been welcomed on-board and have already learned a lot about the products."

Andy reports to Schaeffler AAM (UK) Ltd Technical Services Manager Malcolm Short, who said: "We are really pleased to welcome Andy on-board. I am sure he will be a major asset to the company and will help us continue to supply the level of professional training that our customers have come to expect."

Initially, Andy said a lot of his time will be spent on providing training to customers on the company's LuK RepSet® 2CT repair solution for dry double clutch systems.

He added that he will also deliver internal training to staff as new products come on stream and will support the company's technical hotline team (UK Tel: 08457 001100, Ireland Tel: +44 (0)1432 264264).
