SCHAEFFLER

APQP Status Report					
Information Schaeffler	Information supplier	Customer driven requirements			
Project name	Supplier	Sample index	Date (DD.MM.YYYY)		
Part description Schaeffler	Part description supplier	Complexity level 1	Revision No.		
Drawing number Schaeffler	Drawing number supplier	Product-maturity level	Sampling submission level		
ECV-Number & Index	Revision index supplier	APQP responsibility	PPAP Status		
Revision index Schaeffler	Contact person supplier	APQP coordination	Target date PPAP release (DD.MM.YYYY)		

Sample deliveries	Date (DD.MM.YYYY)					Total APQP Status rating		Time schedule	Content related	
Deadline of offering					Main elements		(for product maturity only)			
Nomination		Quantity	Comment	Status %	Red					
M2 sampling date					Yellow Green	36	Comments &			
M3 sampling date					Not		running actions			
M4 (Volume production)					Sub elements					
Mass production date Schaeffler						28

No		()	Time schedule		Finished	Responsible	Explanation	
•	APQP Elements	Content related	Target date	Target date Actual date				
1	Customer requirements							
2	Change Management							
3	Communication and escalation matrix							
4	Project schedule							
5	Feasibility evaluation Feasibility evaluation available (according quotation drawing) (1)							
	Feasibility evaluation available (according quotation drawing) (1)							
6	Capacity confirmation							
7	Safe Launch							
	General requirement of safe launch agreed with supplier. Estimated safe launch concept							
	Final Safe Launch Control plan (includes Cpk-results) agreed							
8 9	Requalification Technical review and action plan							
9 10	Nomination / ordering							
10	Prototyping order				- ·			
	Initial samples M4 ordered				- ·			
	Volume production ordered				1			
12	Supplier-Qualityplan							
13	Design Analysis Design Verification Plan (DVP)				I			
14 15	Design Verification Plan (DVP) Process Verification Plan (PVP)							
15	Return and defective part analysis concept							
10	General requirements (e.g. 8D method, NTF) defined				1 .			
	Final concept available (within quoted price scope)				- ·			
17	Craftmanship / Appearance / Cross pattern catalog							
	List of special characteristics							
	Definition of measuring methods							
	Measuring homologation (Homologation; summary sheet for remaining risks							
	Inspection and measuring equipment capability Part history							
22	Product Audit Supplier							
24	Material declaration and conformity certificate							
	Equipment and Tools							
	Machines and tools status: Time schedule existing (improvement - try out - ready)				1			
	Machines and tools ordered							
	Machines and tools ready							
	Machine and tool maintenance final Emergency concept							
	Spare part planning final				- ·			
26	Process FMEA							
	Formal requirements of Schaeffler are considered. The mentioned characteristics on the				- ·			
	All corrective actions are applied and effective				1 .			
	The remaining risks in the yellow and red area of the risk matrix assessed or agreed with							
	Schaeffler and considered in the further planning.							
27	Prototype Control Plan (prototype PLP)							
28 29	Process flow chart and volume production layout Process Planning Assessment							
30	Process Planning Assessment Production and inspection of prototype parts				1			
31	Preliminary Process Capability Study				1			
	Preliminary process capability evidences agreed (preliminary and long tern)				1 '			
	Proof of preliminary process capability with individual values					-		
32	Mass Production Control Plan (mass production PLP)							
33	Process Instructions				I			
34	Logistics concept Transport routes, incl. customs arrangements (where applicable) defined				4 .			
\vdash	Call-off system, e.g. Web-EDI implemented				1 .			
35	Packaging Concept							
	Volume production packaging agreed, incl. corrosion protection				1 .			
	Emergency packaging solution defined				1 '			
36	Traceability concept					-		
37	Quality planning subcontractor				1 .			
\vdash	Subcontractor nomination done				4.			
\vdash	Subcontractor quality planning agreed PPAP subcontractor done (at least yellow status)				+ •			
\vdash	PPAP subcontractor done (at least yellow status) PPAP subcontractor done (green status)				1 .			
38	Process-Launch-Assessment							
39	Capacity Trial Run				1			
40
